

CAREER OBJECTIVE

A motivated B.Tech AI & Data Science student seeking a career in database management, SQL and Machine Learning. Passionate about data handling, problem-solving, and learning modern database technologies to deliver efficient, accurate, and reliable solutions for organizational growth.

WORK EXPERIENCE

Machine Learning • Internship
PHP MasterMinds, Coimbatore

Jun 2025 - Jul 2025

- Built an AI-based "Personality Prediction System through CV Analysis" during the internship program.
- Executed tasks related to Artificial Intelligence and data analysis with strong problem-solving skills.
- Learnt practical implementation of AI concepts, CV processing, and personality prediction techniques.
- Demonstrated professionalism, effective task execution, and dedication throughout the internship period.

EDUCATION

B.Tech, Artificial Intelligence And Data Science
Saveetha Engineering College
CGPA: 8.60/10

2024 - 2028

Senior Secondary (XII), Tamil Nadu State
Science
Seventh Day Adventist Matriculation Higher Secondary School, Hosur
Percentage: 92.40%

2024

Secondary (X), Tamil Nadu State
Seventh Day Adventist Matriculation Higher Secondary School, Hosur
Percentage: 87.40%

2022

PROJECTS

TELECOM CUSTOMER CHURN PREDICTION ↗
Jun 2026

A smart Streamlit app that helps predict whether a telecom customer is likely to stay or leave, explains the main reasons behind that prediction, and suggests practical retention actions. This project was built to make customer risk easier to understand for non-technical users, so the app uses simple language like Will Stay and Will Leave instead of technical terms.

HOMIS - HOspital Management and Information System ↗
Mar 2026 - May 2026

HOMIS is a Hospital Management and Information System currently in the development phase. The project reached the final stage and focuses on streamlining hospital operations such as patient management, appointment scheduling, medical records handling, and administrative tasks through an efficient digital platform.

PERSONALITY PREDICTION SYSTEM THROUGH CV ANALYSIS USING AI ↗

Jun 2025 - Jul 2025

This project focuses on developing an AI-based Personality Prediction System that analyzes resumes/CVs to identify personality traits using Machine Learning techniques. The system processes user data and textual information from resumes to predict personality characteristics, helping in recruitment and candidate evaluation. The project involves data preprocessing, feature extraction, and model training using Python and Machine Learning libraries to generate accurate personality insights

SKILLS

- SQL
- Python
- SQLite

ADDITIONAL DETAILS

- Participated in the national-level THREX Hackathon and advanced to the pre-finals. Collaborated in a team environment to solve real-world problems, showcasing innovation, problem-solving, and technical skills.
