WORK EXPERIENCE

ML Engineer | Internship

Jun 2025 - Jul 2025

PHP MasterMinds

On-site • Coimbatore

- Built an AI-based "Personality Prediction System through CV Analysis."
- Executed AI and data-analysis tasks with strong problem-solving skills.
- Learned practical implementation of AI concepts, CV processing, and personality-prediction techniques.
- Demonstrated professionalism and task ownership throughout the internship.

Technologies / Skills Used : Python

EDUCATION

Saveetha Engineering College | Chennai

2024 - 2028

B.Tech - Artificial Intelligence and Data Science

CGPA : 8.40

I am a AIDS student at Saveetha Engineering College with a strong foundation in Machine Learning, Python, SQL, and Database Management Systems. I have built and deployed multiple academic and personal projects, earned industry-recognized certifications, and continuously improved my problem-solving skills through coding practice. My coursework includes Data Structures & Algorithms, Operating Systems, Computer Networks, and Software Engineering, enabling me to develop practical, scalable solutions. I demonstrate leadership by taking ownership of projects, collaborating effectively with teams, and maintaining a proactive approach to learning and innovation.

PROJECTS

AI Resume Personality Analyzer | 🏠 Github

Jun 2025 - Jul 2025

Developer

- Developed a production-style **Streamlit MVP** that processes **PDF** and **DOCX** resumes. Parsed structured candidate data, predicted resume categories using a trained **scikit-learn** model, and inferred rule-based personality tendencies. Integrated with **Firebase Auth**, **Firestore**, and **Firebase Storage**.

Technologies / Tools Used : Python

Telecom Customer Churn Prediction | 🏠 Github 🌐 Website

May 2026 - May 2026

Developer

A Streamlit-based ML app that predicts whether a telecom customer will stay or leave. The system explains the top reasons behind its prediction in plain language, renders a live risk-probability gauge chart, and recommends up to 3 tailored retention strategies — designed so non-technical business users see "Will Stay" or "Will Leave" instead of raw model outputs.

Technologies / Tools Used : Python

SKILLS

Programming Languages : Python, SQL, Java

Frameworks & Libraries : Django

Tools & Platforms : GitHub, Git

Databases : MySQL, PostgreSQL, SQLite, MongoDB, Firebase

Soft Skills : Teamwork, Time Management, Collaboration

Languages : English, Tamil, Telugu
